

# Mobile Services

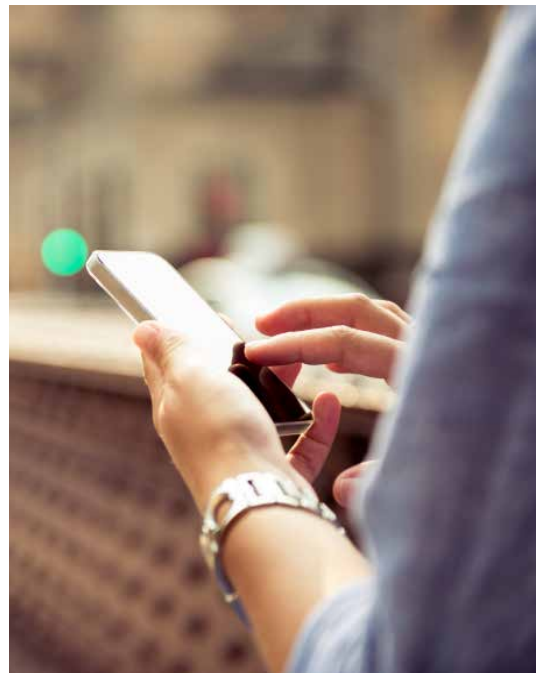

The convergence of telecommunication and computing devices has signaled an exponential growth in the mobile landscape. Today's sophisticated users expect applications to work seamlessly on any mobile devices. To be successful, it is important for startups, ISVs and small-and medium sized enterprises (SME's) to focus on their core offerings and rely on IT solution partners to provide quality mobile application development services.

**Data-Core's mobile applications practice is focused on creating the best-in-class mobile applications which will revolutionize end-user applications and enterprise mobility.**

We have proven expertise working with different handset and platforms, including iOS, Blackberry, J2ME, Windows Phone, Android, Sybase Unwired Platform, Adobe Flex, WebOS and other open source technologies.

Data-Core provides a variety of Mobile Services for various industries. Our offerings include:

- Product and platform development
- Application porting and mobile enablement
- Mobile application testing
- Mobile reporting and gathering tools
- Mobile commerce and payment
- Mobile sales force automation and mobile CRM
- Mobile productivity and PIM
- Mobile marketing and advertisement
- Mobile entertainment and media

Data-Core's Mobile Services help enterprises make smart decisions in adopting mobility solutions to drive business results. With our domain expertise and understanding gained over 25 years, our team of experts leverage Data-Core's client insights, as well as best practices, across several industries to deliver innovative solutions to enhance client's ability to conduct their business.

Data-Core has applied its deep technology expertise over the years of designing and developing mobile technologies, including mobile handsets for leading global brands, to the refinement of methodologies, creation of license-free reusable components, tools and processes. Our large pool of experts delivers the best-of-breed solutions to our clients.

Our multiple service offerings allow our clients a wider choice of engagements, including an offshore-leveraged “flex” model.
